

Company name : Workable

Key Responsibilities

- **Design & Analysis:** Create 3D models, blueprints, and detailed drawings using Computer-Aided Design (CAD) software. Run simulations to test structural and thermal performance.
- **Prototyping & Testing:** Build and test working prototypes. Analyze test results and modify designs to fix errors or improve efficiency.
- **Manufacturing & Production:** Oversee the manufacturing process. Ensure final products meet safety standards, budgets, and project goals.
- **Problem Solving:** Investigate equipment failures and find practical fixes. [[1](#), [2](#), [3](#), [4](#)]

Required Skills & Qualifications

- **Education:** A bachelor's degree in mechanical engineering or a closely related field.
- **Technical Skills:** Strong grasp of core concepts like thermodynamics, fluid mechanics, and math. Proficiency in CAD tools and analysis software.
- **Soft Skills:** Good communication, teamwork, and project management abilities
